MOHAMMAD ALTARIFI

Amman, Jordan | +962786622701 | mo.tarifi2004@gmail.com

Professional Summary

Software Engineering graduate with practical experience in ASP.NET development, SQL databases, and web application design. Experienced in developing backend systems, implementing business logic, and delivering software solutions through academic and professional projects. Able to contribute to organizational success by building efficient applications, solving technical challenges, and collaborating effectively within development teams.

TECHNICAL SKILLS

- **Programming Languages:** C#, Java, HTML, CSS, JavaScript, Dart, PHP, Python
- **Frameworks:** ASP.NET MVC, Entity Framework Core, Bootstrap, Qt
- **Databases:** SQL Server, PocketBase
- **Tools:** Visual Studio 2022, Visual Studio Code, NetBeans, Notion, Canva
- **AI Tools:** ChatGPT, Google Gemini, DeepSeek

PROJECTS

PRO HEALTH (Graduation Project)

- • Description: An AI-powered health and weight-management platform that generates customized wellness plans based on user data and health metrics, featuring direct communication with system administrators.
- • Role: User Panel Developer, QA Tester, & System Documenter (Context Diagrams, DFDs, ER Diagrams, Use Cases, and Relational Models).
- • Tech Stack: C++, Qt Framework, PocketBase, Gemini API.

CampusConnect

- • Description: A dynamic web platform designed to streamline the management and organization of university events, enabling students to seamlessly explore and register for upcoming workshops and activities.
- • Tech Stack: PHP, HTML, CSS, MySQL.

ONLINE EXAM

- • Description: A dynamic e-examination web portal allowing instructors to design, customize, and configure online tests, while providing students with a seamless interface to take their exams.
- • Tech Stack: ASP.NET MVC, C#, Entity Framework Core, SQL Server, HTML5, CSS3, JavaScript, Bootstrap.

Student Registration System

- • Description: A standalone, student management desktop application developed as a personal project to handle student enrollment and academic profiles.
- • Tech Stack: Java.

PROFESSIONAL EXPERIENCE

Al-Raja International Company | ASP.NET Developer Trainee
February 2026 – June 2026 | Amman, Jordan

- Developed and optimized robust backend features using ASP.NET MVC, improving application response time by 25% and ensuring seamless system scalability.
- Designed and built relational database architectures utilizing SQL Server, optimizing complex queries and indexing to reduce query execution time by 30%.
- Implemented over 10+ core business logic modules and RESTful APIs, streamlining student registration and administrative processes while reducing manual data entry errors.
- Developed automated business workflows, cutting down manual processing time for internal reporting by 40% through efficient data processing structures.

EDUCATION

- **Bachelor of Software Engineering**
  International Islamic Sciences University (WISE) – College of Information Technology
  GPA: Very Good

CERTIFICATIONS

- HTML Essentials – Cisco (June 2026)
- Full-Stack Development – Al-NoMo Growth Platform (Al-Hussein Technical University) (September 2025)
- Artificial Intelligence Fundamentals – Udacity & Jo Codes (March 2025)
